3 Ways to Play Flash on iPhone 6 (Plus)

Since Adobe Flash Player is not supported by iOS device, this guide lists 3 effective methods to watch flash on iPhone without jailbreaking.

What's missing in iPhone 6

Not just a bigger display, a better display. The new Retina HD display of iPhone 6 (Plus) enhances your visual experience to watch movies. If you must have a phablet, Apple iPhone 6 (Plus) is a powerful and attractive choice. In fact, most web video has been optimized to play just fine on iPhone 6 (iOS 8) device. But the adobe's flash player is still incompatible with iPhone 6(Plus). It seems that there is no way to play flash games (videos) on the iPhone 6 (Plus).

The iPhone 6 (Plus) only support video formats as follows: M4V, MP4, MOV; and the flash video has two different video file formats: FLV and F4V. Flash Video is

viewable on most OS via Adobe Flash Player, web browser plugin or the third party programs. Apple's iOS devices including iPhone 6 (Plus) don't support the flash player. So in this guide I will show you how to **play flash games on iPhone 6** (Plus) in the 3 methods.

[Method 1: Play flash on iPhone 6 via flash web browsers](#)

[Method 2: Play flash on iPhone 6 via video player apps](#)

[Method 3: Play flash on iPhone 6 via flash video converter](#)

Method 1: Play flash on iPhone 6 via flash web browsers

Compared with Safari, the [Photon Browser](#) is a powerful web browser with flash capability which is designed to enhance visual viewable experience on the iPhone 6 (Plus). It allows you to play Hulu videos, free games from facebook.com & kongregate.com, etc. The Photon connects the iPhone to a remote computer that can run flash games and then steams the desktop session to your iPhone 6 (Plus). Because of adopting virtual desktop, it maybe causes some problems such as some slowness and interface quirks.

In order to view flash sites, just tap the "lightning bolt" button to enter steaming mode. If you are looking for flash supported browsers for iPhone, Photon probably is the best choice.

Method 2: Play flash on iPhone 6 via video player apps

GoodPlayer is the ideal solution which plays videos in various formats including FLV, F4V, HD mkvs, rmvbs, etc. What's more, it has a built-in web browser and downloader. So it's not just a local media player. It supports a variety of subtitle language encoding and subtitle font customization. If want to know more functions about GoodPlayer for iPhone, click here to read it.

If you want to play flash videos on the iPhone 6 (Plus), the "Open in" supported feature allows us to open video from mail attachments and Safari web browser. By the way, here is a list of the best video player app for iPhone 6 (Plus), which also works for iPhone 5, iPhone 5s, iPad.
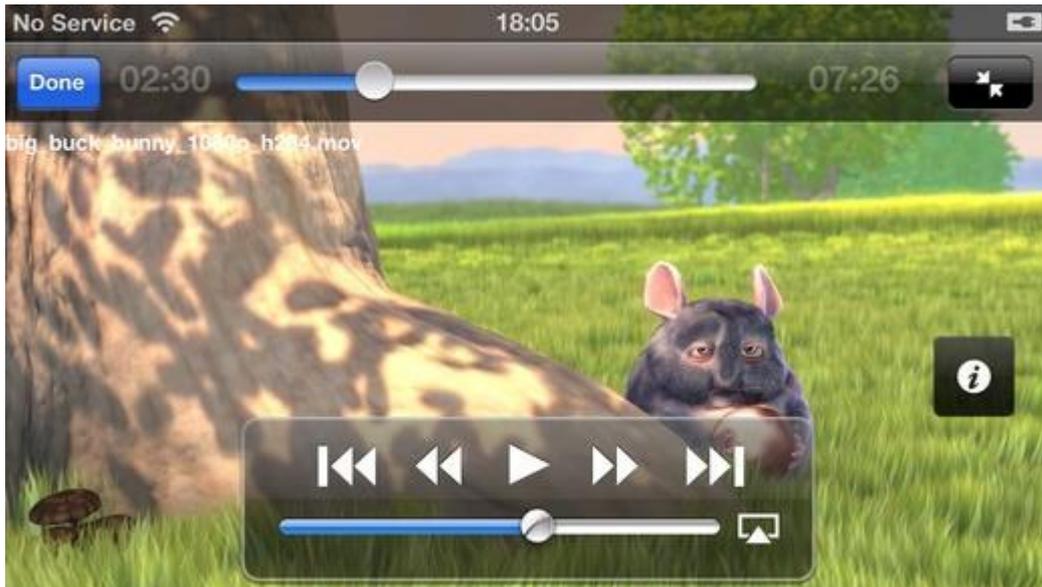

Method 3: Play flash on iPhone 6 via flash video converter alternative

Generally speaking, it needs uninterrupted network when you watch a flash online.

Of course, it takes more battery. If you want to play flash video offline on iPhone 6

(Plus), imelfin video converter is the best flash to video converter for iPhone.

1) imElfin video converter won't destroy animation but make it better.

2) It can download and capture flash video from website.
