It's likely that you will soon get your iPhone 5s. Or you are already an experienced apple follower having at least one of the followings: iPod Touch, iPhone, iPad, Mac. Of course, you can also have them all along with sufficient skills regarding iTunes transfer. On the other hand, however, I don't think you will like spending money on digital content, such as music or songs, when there are ways to get it free and legally. Rather, you will be interested in this. Therefore I collected a list of sites to download free music for iPod, iPhone, iPad, iTunes (Mac/PC) or even MP3 player in this post.

Generally, apple users will go to [iTunes store for free music](#). You can absolutely do so. But it's clear that free songs provided by Apple iTunes are very limited.
