

# Free H.264 Codec Download for Playback

Free download H.264 codec pack to encode or decode H.264 videos including MP4, MKV, MOV etc on Mac or Window.

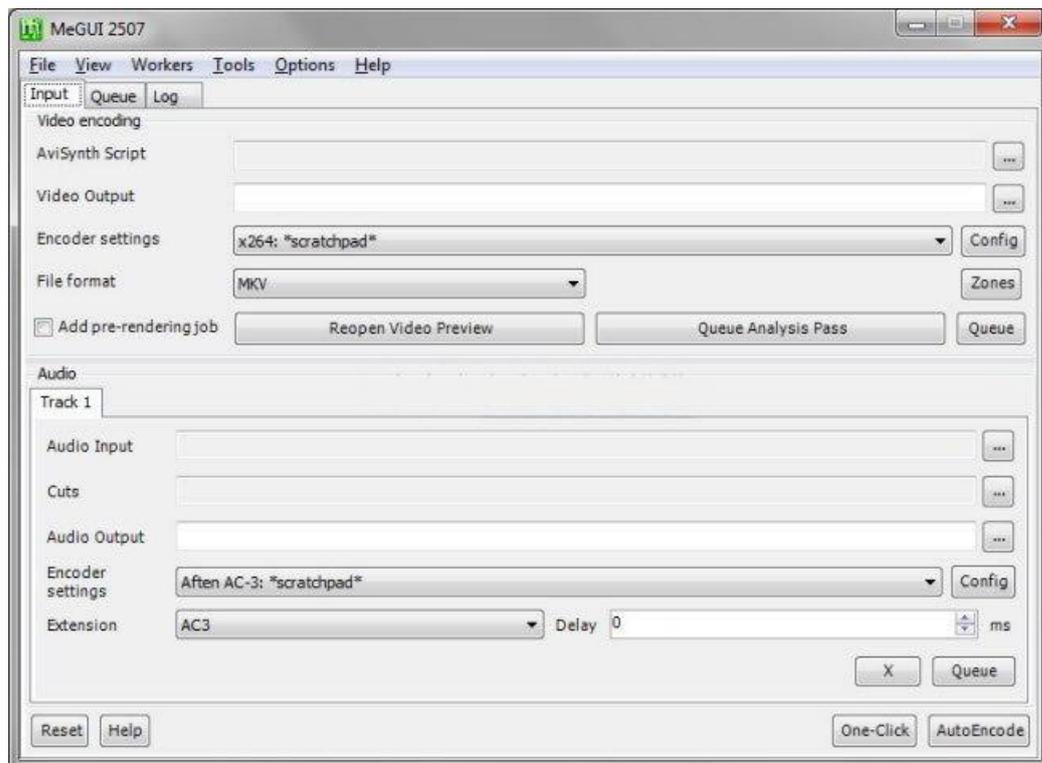

H.264 is a widely video format used for compression, recording and streaming of video content. For example, Blu-ray discs adopt the H.264 video encoding standards and thence all Blu-ray disc players must be able to decode H.264. The iTunes store, Adobe Flash Player, YouTube, Vimeo, Microsoft Silverlight and other HDTV broadcasts also apply H.264 lossy compression to generate and distribute digital video content.

The H.264 standard videos deliver high definition video at super low data rates. So some would like to convert DivX, AVI, MKV, AVCHD to H.264 so as to preserve HD video quality. And they make H.264 videos compatible with Apple devices such as iPad, iPhone, Apple TV, iTunes, iMovie, etc. If you want to know more about H.264, refer to [Wikipedia H.264/MPEG-4 Part 10](http://Wikipedia H.264/MPEG-4 Part 10).

## H.264 Video Codec 2525
