

How to Convert Video to MP4

There are sites/freeware enabling users to convert video to MP4 free. This guide shows another program to convert video to MP4 easily and fast.

We download videos from [YouTube and other free video downloading sites](#) at times. At other times, we purchase HD DVD (or Blu-ray) movies. Playing DVD (or Blu-ray) with DVD/Blu-ray player is easy at home. But if we want to play downloaded YouTube videos (in FLV mostly) or DVD movies on a mobile device for watching on the go, we will have to **convert video to MP4**.

Correctly, we should choose MP4. MP4 is a universal video format supported by Mac, PC and smart phones/tablets. Formats like AVI or WMV are exclusively supported by Windows Media Player and MOV is only accepted by Mac Quick Time.

How to convert video to MP4 free

Some sites enable users to convert video to MP4 free online, such as **online-convert.com**, but users have to upload personal videos beforehand, which is indeed less convenient. There are also a number of free video to MP4 converter software, such as **HandBrake** and **Any Video Converter**. These programs accept many video formats, but are less stable in some cases. In addition, few of them are able to rip DVD or convert DVD videos to MP4 format. If you prefer a

seamless method to convert videos to MP4, you are bound to choose a more professional tool.
