Effective ways to fix a scratched Blu-ray disc

Fix scratched Blu-ray discs using toothpaste

A clean, soft and lint-free cloth should be needed. Then we apply a small amount of toothpaste which does not contain particles or gels. Then gently rub it over the scratched Blu-ray disc. Wipe it outwards from the center of the disc until free of toothpaste and don't rub in circular motions.

Then clean the Blu-ray disc thoroughly with cold water, and make sure that you remove all of the toothpaste. Dry the scratched Blu-ray disc with another extra soft and dry cloth. Okay, try to test the disc for playback.

Fix scratched Blu-ray discs using banana

Can banana help us to repair scratched Blu-ray? Are you kidding me? No, it would be a very cheap cost-effective solution. Firstly, apply a freshly cut banana to the

disk and wipe the surface of the Blu-Ray disc with the banana peel (the inside). Then polish and further clean the disk with the wax from the peel. Finally take a clean cotton cloth to wipe the entire surface of the Blu-ray disc. Clean the Blu-ray disc with water, polish it with a dry soft cloth and leave it dry.

Fix scratched Blu-ray discs using Car Wax

Car Wax can protect our Blu-ray discs from scratching further in the future. We can apply turtle car wax in liquid form onto a soft and clean cloth. And then buff it in an in-to-out motion. Clean the surface of the complete disc by using the soft cloth and wash it under cold water. Make sure that you thoroughly remove any excess wax dust. Keep it dry for a few hours and test the repaired Blu-ray disc in your Blu-ray driver again.
