[Method 3: iCloud backup transfer data from old iPhone to new iPhone](#)

iTunes to transfer data from iPhone to new iPhone 6

Not long ago a collection of celebrity photo leaks threw Apple into risk. So it's not safe to use iCloud backup and sync data to new iPhone 6. If you prefer traditional transfer method in the iTunes library than using cloud, this method enables us to backup all data from old iPhone to new iPhone 6.

Step 1: Download the latest iTunes library to the local computer. Install and launch the free iTunes library.

Step 2: Plug your iPhone into the computer using the USB cable. Then your iPhone 6 will show under Device option.

Step 3: Click your old iPhone's name to view the control panel. Click "Back Up Now" to copy data from Old iPhone to this computer.

Step 4: Once it finishes backing up all data, plug the new iPhone 6 into the computer. In the iPhone 6 control panel, click "Restore Backup..." and all data will be moved to new iPhone 6.

Backups

Tips: This method can be applied to **transfer data (Apps/Photos/Music/Movies)** from iPhone 4s to iPhone5 in the same way. Just only switch to different option in the control panel. iTunes can also help us manage contacts, calendar, and

bookmarks on the computer. Here is the full guide about [how to transfer or sync content to your computer](#).

Q: How can I **transfer contacts from iPhone to iPhone 6?**

A: So easy. Click "Info" option on the right upper control panel. Then scroll down to the bottom of the screen to Advanced section. The rest steps are similar to before.

Q: Can I transfer my movies purchased from iTunes library to iPhone 6? How to share iTunes purchased movies with my friends?

A: The first method is that you should share your Apple ID and password with my friends. And Apple limits us to authorize devices with only 6. Therefore, this method is not used extensively. The second method is to [remove protection from iTunes purchased movies](#).

iCloud backup transfer data from old iPhone to new iPhone

In my eyes, iCloud is an optional free program. In compliance with the following steps before, go forward to *Setting->General-> Reset->Erase All content and Setting->Restart and Recover iPhone (Plus)*.

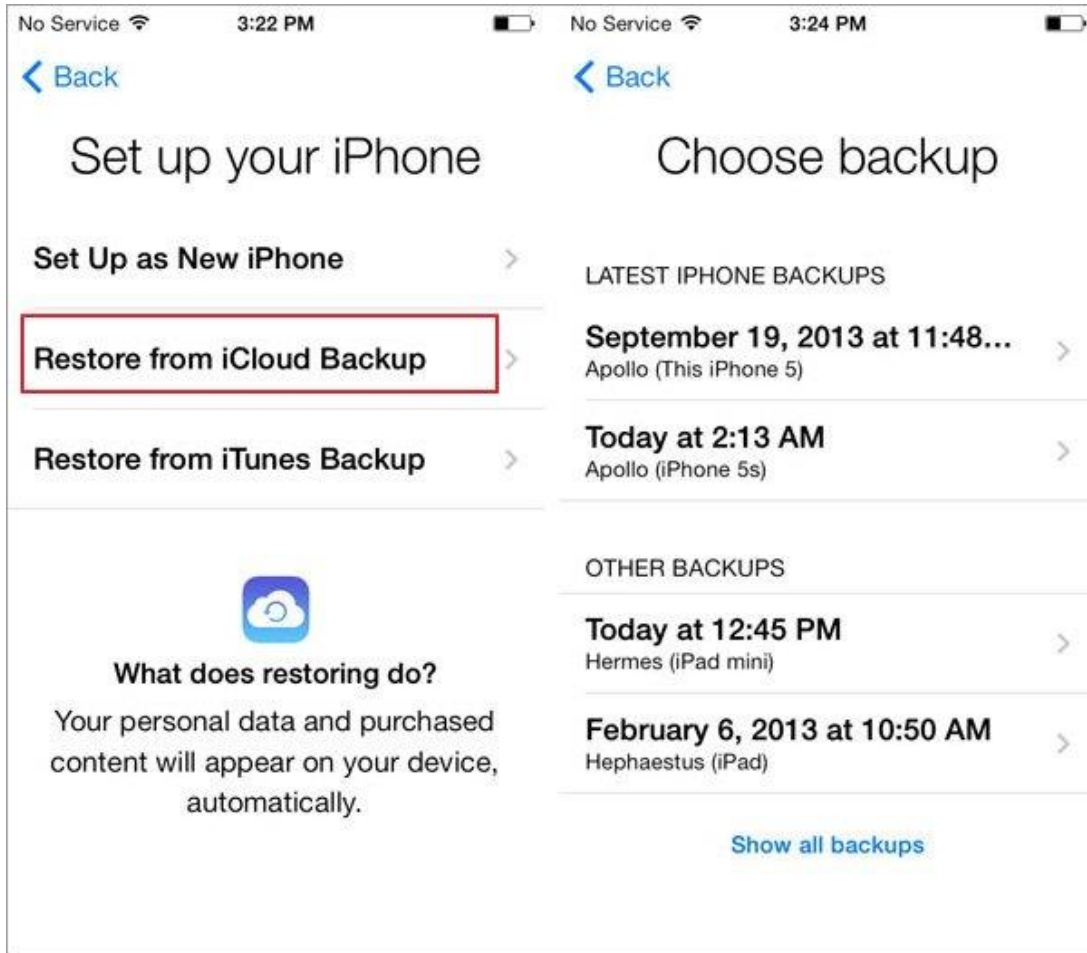

Step 1: Turn on wifi on the old iPhone

Step 2: *Navigate to Settings > iCloud > Storage & Backup > turn on iCloud Backup > OK > Back up Now*. It will prompt you input Apple ID password. Then Click *Backupnow*. After all content has been stored in iCloud, turn on the new iPhone 6 (Plus) and follow the on-screen instructions to finish the setup.

Step 3: Select language, country and enable location services. When it's done, choose wifi network. Pay attention to the next step: *Set Up iPhone*. Select *Restore from iCloud Backup* and choose the backup data from old iPhone. Input iCloud ID and password. Then wait for **restoring iPhone 6 (Plus) from the backup**.

Step 4: After the restore process is done, the iPhone 6 (Plus) will restart. Now we can use our loved iPhone 6 (Plus).

By the way, if your iTunes library is full of a variety of duplicate songs before you backup all songs, iTunes Cleaner should be downloaded to fix and remove all duplicates.
